

# Proposal how to handle members from non-IFC countries

- These members are currently all affiliated scientists (e.g. Australia and Germany) and are a small fraction of collaboration
  - Australia: 1
  - Germany: 3
- Affiliated Scientists must bring something of value to the collaboration's science effort; bar is relatively high for new affiliated scientists – do not expect number from non-IFC countries to grow significantly (i.e. < 20% of Affiliated Scientists; < 2% of OCF share)
